Election/Restrictions

1. Claims 21-36 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 7.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 5, 9-12, 15, 19, and 20 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Zachman (5237758).
3. Claims 1, 2, and 9-12 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Dow (2364134).
4. Claims 1, 2, 6, 7, 9-12, 16, and 17 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Enos (2333303) or Mackenzie (2349975).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 3, 4, 13, and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dow, Enos, or Mackenzie.

Dow, Enos, or Mackenzie discloses the claimed invention except for the exact material for the mesh. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use a knit of spun fibers, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. In re Leshin, 125 USPQ 416.

7. Claims 7, 8, 17, and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zachman in view of Crooker (2557946).

Zachman shows a shoe with a sole comprising a sole layer (12) and a mesh layer (15) substantially as claimed except for the mesh being coterminus with the bottom of the sole and the sole having profile grooves. Crooker teaches providing a "mesh" (15) coterminus with a bottom of a sole (see figures 3 and 4) and teaches the well known and conventional use of profile grooves (see figures 1 and 2) in a sole. It would have been obvious to make the mesh coterminus with the sole and to provide profile grooves as taught by Crooker in the shoe of Zachman to increase traction and cushioning.

1. Telephone inquiries regarding the status of application or other general questions, by persons entitled to the information, "should be directed to the group clerical personnel and not to the Examiners. In as much as the official records and applications are located in the clerical section of the examining groups, the clerical personnel can readily provide status information without contacting the examiners", M.P.E.P. 203.08.
